

PRESS RELEASE FOR IMMEDIATE DISTRIBUTION

Infosim[®] announces release of StableNet[®] 7.6

July 2016

Wuerzburg/Austin/Singapore, July 27th, 2016 – Infosim[®], the technology leader in automated Service Fulfillment and Service Assurance solutions, today announced the release of version 7.6 of its award-winning software suite StableNet[®] for Telco and Enterprise customers.

StableNet[®] 7.6 provides a significant number of powerful new features, including:

- StableNet[®] Server is now using Java 8:
 - Higher Security
 - More Efficiency
 - Ready for the future – compliance & support
 - Backwards compatibility
- CLI support for Brocade Session Directors
- Dashboard Manager
- Support for devices without an IP address; they can be added during an XML Discovery if a CSV file is used
- new Web GUI Maintenance View
 - shows a list of devices that have at least one measurement for which a maintenance is scheduled in the future,
 - shows devices with a maintenance that ended within the last 24 hours (the time span is configurable to 12 hours, 24 hours and 48 hours),
 - provides information on the next maintenance (start time and duration), when the last maintenance ended or when the current maintenance will end,
 - allows to enable and disable measurements and monitors.

StableNet[®] version 7.6 is available for purchase and download now. Customers with current maintenance contracts may upgrade free of charge as per the terms and conditions of their contract.

Supporting Quotes:

Andrew Tiedemann, CEO Infosim[®], Inc.

“The release of the new feature rich StableNet version will provide customers with the monitoring, fault finding and configuration tools they need, setting Infosim even farther apart from more than a dozen competitors.”
