

PRESS RELEASE FOR IMMEDIATE DISTRIBUTION

Infosim[®] announces release of StableNet[®] 7.5

October 2015

Wuerzburg/Austin/Singapore, October 26th, 2015 – Infosim[®], the technology leader in automated Service Fulfillment and Service Assurance solutions, today announced the release of version 7.5 of its award-winning software suite StableNet[®] for Telco and Enterprise customers.

StableNet[®] 7.5 provides a significant number of powerful new features, including:

- Dynamic Rule Generation (DRG); a new and revolutionary Fault Management concept
- REST interface supporting the new StableNet[®] iPhone (and upcoming Android) app
- Highly customizable dashboard in both the GUI and Web Portal
- Enabling integration with SDN/NFV element managers
- NCCM structurer enabling creation of optimized and well-formatted device configurations
- New High-Availability (HA) infrastructure based on Linux HA technology
- Syslog & Trap Forwarding enabling integration of legacy systems that rely on their original trap & syslog data
- Open Alarms GeoMap enabling geographical representation of open alarms

StableNet[®] version 7.5 is available for purchase now. Customers with current maintenance contracts may upgrade free of charge as per the terms and conditions of their contract.

Supporting Quotes:

Jim Duster, CEO Infosim[®], Inc.

“We are happy that our newest release is again full of innovative features like DRG. Our customers are stating this new DRG feature will help them receive a faster ROI by improving automation in their fault management area and dramatically increase the speed of Root-Cause Analysis.”

ABOUT INFOSIM[®]

Infosim[®] is a leading manufacturer of automated Service Fulfillment and Service Assurance solutions for Telcos, ISPs, Managed Service Providers and Corporations. Since 2003, Infosim[®] has been developing and providing StableNet[®] to Telco and Enterprise customers. Infosim[®] is privately held with offices in Germany (Wuerzburg - HQ), USA (Austin) and Singapore.

At Infosim[®], we take pride in the engineering excellence of our high quality and high performance products. All products are available for a trial period and professional services for proof of concept (POC) can be provided on request.

ABOUT STABLENET[®]

Infosim[®] develops and markets StableNet[®], the leading unified software solution for Fault, Performance and Configuration Management. StableNet[®] is available in two versions: Telco (for Telecom Operators and ISPs) and Enterprise (for IT and Managed Service Providers). StableNet[®] is a single platform unified solution designed to address today's many operational and technical challenges of managing distributed and mission-critical IT infrastructures.

Many leading organizations and Network Service Providers have selected StableNet[®] due to its enriched features and reduction in OPEX & CAPEX. Many of our customers are well-known global brands spanning all market sectors. References are available on request.
