PRESS RELEASE FOR IMMEDIATE DISTRIBUTION

Infosim® announces release of StableNet® 8.3

May 2018

Wuerzburg/Austin/Singapore, May 18th, 2018 – Infosim®, the technology leader in automated Service Fulfillment and Service Assurance solutions, today announced the release of version 8.3 of its award-winning software suite StableNet® for Telco and Enterprise customers.

StableNet® 8.3 provides a significant number of powerful new features and improvements, including:

- SNEA V2.0 - new concept based on Intel® hardware including IoT support
- Initial Resource Management
- New Netflow Query Web Portal
- Improved Distributed Syslog Module
- Next Level Configuration Portal – Zero-Touch Activation at your fingertips
  [Project Development – demo available on request]
- Enhanced End-of-Life (EoL) and Vulnerabilities definitions (CVSS v3.0 compatible)
- New and enhanced commands for Template Based Config Jobs
- Enhanced Device Support, Tagging Features, REST API and usability improvements

StableNet® 8.3 is available for purchase and download now. Customers with current maintenance contracts may upgrade free of charge as per the terms and conditions of their contract.

Supporting Quotes:

Marius Heuler, CTO Infosim®
"The introduction of our new Resource Management functionality marks another milestone in the development of StableNet® towards an all-encompassing management platform. As one of the people responsible for the roadmap I am really excited to finally see this happen!"

ABOUT INFOSIM®

Infosim® is a leading manufacturer of automated Service Fulfillment and Service Assurance solutions for Telcos, System Integrators, Managed Service Providers and Enterprise Corporations. Since 2003, Infosim® has been developing and providing StableNet® to Telco and Enterprise customers. Infosim® is privately held with offices in Germany (Wuerzburg – HQ, Muenster), USA (Austin), and Singapore.

At Infosim®, we take pride in the engineering excellence of our high-quality and high-performance products. All products are available for a trial period and professional services for proof of concept (POC) can be provided on request.

ABOUT STABLENET®

Infosim® develops and markets StableNet®, the leading unified software solution for Fault, Performance, Configuration and Services Management. StableNet® is available in two versions: Telco (for Telecom Operators and ISPs) and Enterprise (for IT and Managed Service Providers). StableNet® is a single platform unified solution designed to address today's many operational and technical challenges of managing distributed and mission-critical IT infrastructures.

Many leading organizations and Network Service Providers have selected StableNet® due to its enriched features and reduction in OPEX & CAPEX. Many of our customers are well-known global brands spanning all market sectors. References are available on request.
