

# PRESS RELEASE FOR IMMEDIATE DISTRIBUTION

## Infosim<sup>®</sup> announces release of StableNet<sup>®</sup> 8.4

February 2019

**Würzburg/Austin/Singapore, February 4<sup>th</sup>, 2019** – Infosim<sup>®</sup>, the technology leader in automated Service Fulfillment and Service Assurance solutions, today announced the release of version 8.4 of its award-winning software suite StableNet<sup>®</sup> for Telco and Enterprise customers.

StableNet<sup>®</sup> 8.4 provides a significant number of powerful new features and improvements, including:

- Alarm tagging
- Optimized memory usage and increased performance
- Cisco ACI support
- All new OpenJDK platform
- New application server: Wildfly 14
- Enhanced resource management
- Enhanced tagging concept (extended functionality and improved usability)
- Unified placeholder syntax in XML Discovery
- GUI now uses a REST interface for faster GUI updates and reduced GUI startup time
- Improved performance for Oracle databases

StableNet<sup>®</sup> 8.4 is available for purchase and download now. Customers with current maintenance contracts may upgrade free of charge as per the terms and conditions of their contract.

### Supporting Quotes:

#### **Marius Heuler, CTO Infosim<sup>®</sup>**

*“With the implementation of the new alarm tagging feature and the overall performance optimization, the release of StableNet<sup>®</sup> 8.4 is marking another milestone in the development of StableNet<sup>®</sup> and the way that data can be handled for management and orchestration.”*

## **ABOUT INFOSIM<sup>®</sup>**

Infosim<sup>®</sup> is a leading manufacturer of automated Service Fulfillment and Service Assurance solutions for Telcos, System Integrators, Managed Service Providers and Enterprise Corporations. Since 2003, Infosim<sup>®</sup> has been developing and providing StableNet<sup>®</sup> to Telco and Enterprise customers. Infosim<sup>®</sup> is privately held with offices in Germany (Würzburg – HQ, Münster), USA (Austin), and Singapore.

At Infosim<sup>®</sup>, we take pride in the engineering excellence of our high-quality and high-performance products. All products are available for a trial period and professional services for proof of concept (PoC) can be provided on request.

## **ABOUT STABLENET<sup>®</sup>**

Infosim<sup>®</sup> develops and markets StableNet<sup>®</sup>, the leading unified software solution for Fault, Performance, Configuration and Services Management. StableNet<sup>®</sup> is available in two versions: Telco (for Telecom Operators and ISPs) and Enterprise (for IT and Managed Service Providers). StableNet<sup>®</sup> is a single platform unified solution designed to address today's many operational and technical challenges of managing distributed and mission-critical IT infrastructures.

Many leading organizations and Network Service Providers have selected StableNet<sup>®</sup> due to its enriched features and reduction in OPEX & CAPEX. Many of our customers are well-known global brands spanning all market sectors. References are available on request.
